

# 1. How to become a registered supplier on SAP Business Network

## 1.0 Ariba Account Types

# Ariba Account Types

Since the introduction of SAP Ariba as dsm-firmenich's cloud procurement solution, all suppliers of dsm-firmenich receive Purchase Orders via the SAP Business Network.

In order to process the Purchase Orders, we strongly advise your organization to create a supplier account on the SAP Business Network. With an SAP Business Network account you can adjust, amongst other things, notification settings and email addresses to ensure the Purchase Orders received from dsm-firmenich can be easily processed.

There are two types of SAP Business Network accounts available:

- Standard Account – no fees apply.
- Enterprise Account – fees apply.

The choice of the Ariba account type is entirely up to your organization. As dsm-firmenich, we can only advice and guide you. On the next page, you can review a high-level overview of the two account types.

Read more about the Ariba account types online: [SAP Business Network for Suppliers | Enterprise Account](#)
