*US FDA 2019 label: 1IU vitamin A = 0.3 mcg retinol activity equivalents (RAE); **Product formulations which utilise Actilease® beadlet technology. Actilease® combines easy handling, bioavailability, and stability of the active.

Additional information | Vitamin A (Retinol)

Role:

Vitamin A is necessary for vision, growth and tissue differentiation. It helps protect the cell membrane structure and is important for keeping the skin, eyes, and inner linings of the body healthy and resistant to infection. Vitamin A is also responsible for hair health and the maintenance and growth of glands.

Food sources:

Liver, kidney, eggs, milk, butter, margarine, fish and fish liver oil.

Health benefits & solutions:

Immunity, Eye health, Infant health, Healthy longevity, Children & young adults, Maternal health, Women's health, Vegetarians & vegans, Beauty from within.

EU health claims:

- *Vitamin A contributes to normal iron metabolism.*
- *Vitamin A contributes to the maintenance of normal mucous membranes.*
- *Vitamin A contributes to the maintenance of normal skin.*
- *Vitamin A contributes to the maintenance of normal vision.*
- *Vitamin A contributes to the normal function of the immune system.*
- *Vitamin A has a role in the process of cell specialization.*

Quali®-D / Vitamin D3 (Cholecalciferol) – liquid*

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Vitamin D3 1.0 MIU/g Stabilized with tocopherol. Oily solution (medium chain triglycerides). Contains 0.90–1.10 MIU Vit. D3/g, 22.5–27.5 mg/g.	●	●	5	50 1157 4.294	●		●	●	●		●	(●)

*US FDA 2019 label: 1 IU vitamin D = 0.025 mcg vitamin D.

Quali®-D / Vitamin D3 (Cholecalciferol) – powder*

Additional information | Vitamin D3 (Cholecalciferol)

Role:

Vitamin D3 helps the body maintain and utilize the calcium and phosphorus needed to build strong bones and teeth. A deficiency of Vitamin D can result in rickets, a disease in which the bones become bent or twisted. It helps calcium to reduce the risk of osteoporosis. Vitamin D3 contributes to the normal function of the immune system and healthy inflammatory response and to the maintenance of normal muscle function.

Food sources:

Liver, fortified milk, fish liver oil and other fatty substances. A precursor in the skin is converted to vitamin D3 by sunlight.

Health benefits & solutions:

Mobility, Heart health, Immunity, Infant health, Healthy longevity, Children & young adults, Maternal health, Women's health, Vegetarians, Beauty from within, Active performance.

EU health claims:

- *Vitamin D contributes to normal absorption/utilisation of calcium and phosphorus.*
- *Vitamin D contributes to normal blood calcium levels.*
- *Vitamin D contributes to the maintenance of normal bones.*
- *Vitamin D contributes to the maintenance of normal muscle function.*
- *Vitamin D contributes to the maintenance of normal teeth.*
- *Vitamin D contributes to the normal function of the immune system.*
- *Vitamin D has a role in the process of cell division.*
- *Vitamin D is needed for normal growth and development of bone in children.*
- *Calcium and vitamin D help to reduce the loss of bone mineral in post-menopausal women. Low bone mineral density is a risk factor for osteoporotic bone fractures.*
- *Vitamin D helps to reduce the risk of falling associated with postural instability and muscle weakness. Falling is a risk factor for bone fractures among men and women 60 years of age and older.*

Additional information

Role:

Vitamin E helps protect cell membranes. It also helps maintain the immune system, prolong the life of red blood cells, maintain a healthy circulatory system and facilitate the body's full utilization of vitamin A. Vitamin E is found in many body tissues – it is especially abundant in adipose tissue, liver, and muscle – and is important for their health and proper functioning. Vitamin E is an antioxidant and is considered to play a role in neutralizing free radicals. These highly reactive molecules are found in the body as a result of normal body processes and from external factors such as environmental pollution. Oxidative damage caused by these reactive molecules is considered to contribute to aging and age-related chronic diseases, such as cataracts, heart disease and cancer.

Food sources:

Nuts, seeds, oil, green leafy vegetables and some fruit.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Infant health, Healthy longevity, Children & young adults, Maternal health, Men's health, Women's health, Beauty from within, Active performance.

EU health claims:

- *Vitamin E contributes to the protection of cells from oxidative stress.*

Quali®-K / Vitamin K1 (Phylloquinone)

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Vitamin K1	●	●	0.1 1	04 3501 5.246 04 3501 5.264	●		●		●	●		●
Dry Vitamin K11% N Spray dried. Starch based. Contains min 1% Vit K1 Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1636 7.341		●			●	●		●
Dry Vitamin K15% SD Spray dried. Based on acacia. 50 mg Vitamin K1/g.	●	●	1 20	04 3492 2.268 04 3492 2.341		●	●	●	●	●	●	●

Additional information

Role:

Vitamin K1 is essential for the clotting of blood; it is involved in the regulation of calcium within bones and helps maintain bone density. In a healthy person, bacteria in the intestine normally provide a substantial amount of this vitamin. A deficiency may occur in newborns and in people consuming antibacterial agents over a prolonged period. These people are frequently given vitamin K1 under a doctor's care. Vitamin K1 can maintain bone health.

Food sources:

Green leafy vegetables, soy beans, broccoli, green cabbage.

Health benefits & solutions:

Mobility, Children & young adults, Maternal health, Women's health.

EU health claims:

- *Vitamin K contributes to normal blood clotting.*
- *Vitamin K contributes to the maintenance of normal bones.*

*Only for North America.

Additional information

Role:

Thiamine is required to help the body use its major source of energy, carbohydrates, to the fullest extent. Thiamine is also essential for proper muscle coordination, the maintenance of peripheral nerve tissue and for normal growth.

Food sources:

Milk, meat, fish, whole grains, legumes, yeast, nuts and seeds.

Health benefits & solutions:

Brain health, Mobility, Heart health, Infant health, Healthy longevity, Children & young adults, Maternal health, Active performance.

EU health claims:

- *Thiamine contributes to normal energy-yielding metabolism.*
- *Thiamine contributes to normal functioning of the nervous system.*
- *Thiamine contributes to normal psychological function.*
- *Thiamine contributes to the normal function of the heart.*

**Only for North America.

Additional information

Role:

Riboflavin is important in helping the body transform proteins, fats and carbohydrates into energy. It helps maintain healthy skin and eyes and is also necessary for building and maintaining body tissues. It is also involved in the production of red blood cells, which are responsible for transporting oxygen throughout the body and it plays a role in the function of the nervous system.

Food sources:

Milk, green leafy vegetables, meat, fish, whole grains, cheese and eggs.

Health Benefits & Solutions:

Brain health, Heart health, Health from the gut, Immunity, Eye health, Infant health, Children & young adults, Maternal health, Women's health, Beauty from within, Active performance.

EU health claims:

- *Riboflavin contributes to normal energy-yielding metabolism.*
- *Riboflavin contributes to normal functioning of the nervous system.*
- *Riboflavin contributes to the maintenance of normal mucous membranes.*
- *Riboflavin contributes to the maintenance of normal red blood cells.*
- *Riboflavin contributes to the maintenance of normal skin.*
- *Riboflavin contributes to the maintenance of normal vision.*
- *Riboflavin contributes to the normal metabolism of iron.*
- *Riboflavin contributes to the protection of cells from oxidative stress.*
- *Riboflavin contributes to the reduction of tiredness and fatigue.*

*US FDA 2019 label: 1 mg niacin = 1 mg niacin equivalents (NE); **Only for China; ***Only for North America.

Additional information

Role:

Essential for the metabolism of carbohydrates, fats, and proteins. Niacin also plays a role in other metabolic processes in the body, including cellular metabolism, nervous system function, cardiovascular health, skin health, and digestive health. It is involved in the conversion of food to energy.

Food sources:

Meat, fish, whole grains, whole wheat and legumes.

Health Benefits & Solutions:

Brain health, Health from the gut, Maternal health, Beauty from within, Active performance.

EU health claims:

- *Niacin contributes to normal energy-yielding metabolism.*
- *Niacin contributes to normal functioning of the nervous system.*
- *Niacin contributes to normal psychological function.*
- *Niacin contributes to the maintenance of normal mucous membranes.*
- *Niacin contributes to the maintenance of normal skin.*
- *Niacin contributes to the reduction of tiredness and fatigue.*

Quali®-B / Vitamin B5 (Panthenol, Pantothenate)

D-Panthenol	●	●	20	04 1385 2.331	●		●	●				●

Additional information

Role:

Pantothenic acid is essential for the formation of certain neurotransmitter function and hormones. It is also required for metabolism of proteins, fats and carbohydrates.

Food sources:

Yeast, liver, kidney, eggs, peanut products, mushrooms and sunflower seeds.

Health benefits & solutions:

Brain health, Maternal health, Women's health, Active performance

EU health claims:

- *Pantothenic acid contributes to normal energy-yielding metabolism.*
- *Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.*
- *Pantothenic acid contributes to the reduction of tiredness and fatigue.*
- *Pantothenic acid contributes to normal mental performance.*

Quali®-B / Vitamin B6 (Pyridoxine)

*Only for North America.

Additional information

Role:

Pyridoxine is necessary for energy metabolism, the metabolism of amino acids and the building blocks of proteins. It also helps the nervous system to function properly and is essential to a healthy immune system. Vitamin B6, along with folate and vitamin B12, is essential to Heart health. It is involved in the synthesis of hemoglobin, the protein responsible for carrying oxygen in red blood cells.

Food sources:

Liver, salmon, walnuts, peanuts, wheat germ, bananas, carrots, peas, potatoes, beef, lamb and pork.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Eye health, Healthy longevity, Maternal health, Vegetarians & vegans, Beauty from within, Active performance.

EU health claims:

- *Vitamin B6 contributes to normal cysteine synthesis.*
- *Vitamin B6 contributes to normal energy-yielding metabolism.*
- *Vitamin B6 contributes to normal functioning of the nervous system.*
- *Vitamin B6 contributes to normal homocysteine metabolism.*
- *Vitamin B6 contributes to normal protein and glycogen metabolism.*
- *Vitamin B6 contributes to normal psychological function.*
- *Vitamin B6 contributes to normal red blood cell formation.*
- *Vitamin B6 contributes to the normal function of the immune system.*
- *Vitamin B6 contributes to the reduction of tiredness and fatigue.*
- *Vitamin B6 contributes to the regulation of hormonal activity.*

Quali®-Biotin / Vitamin B7 (Biotin, Vitamin B8, Vitamin H)

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
D-Biotin	●	●	0.05 1 (pouch) 25	50 1165 5.240 50 1165 5.268 50 1165 5.372		●	●	●	●	●	●	●
Bitrit-1® Type A	●	●	10 50	50 1651 8.190 50 1651 8.395		●	●	●				●

Additional information

Role:

Biotin is necessary for synthesizing fatty acids and involved in the metabolism of carbohydrates, fats and proteins. It also helps in the maintenance of the nervous system, skin, regulation gene expression and blood sugar.

Food sources:

Yeast, liver, eggs, beef and pork.

Health benefits & solutions:

Brain health, Health from the gut, Infant health, Children & young adults, Maternal health, Beauty from within, Active performance.

EU health claims:

- *Biotin contributes to normal energy-yielding metabolism.*
- *Biotin contributes to normal functioning of the nervous system.*
- *Biotin contributes to normal macronutrient metabolism.*
- *Biotin contributes to normal psychological function.*
- *Biotin contributes to the maintenance of normal hair.*
- *Biotin contributes to the maintenance of normal mucous membranes.*
- *Biotin contributes to the maintenance of normal skin.*

Quali®-B / Vitamin B9 (Folate, Folic Acid)**

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian

Metafolin (Calcium L-methylfolate)***	●	●	0.1 1	50 1557 1.074 50 1557 1.270		●	●	●	●			●

* US FDA 2019 label: 1 mcg folic acid = 0.6 mcg dietary folate equivalents (DFE); **Metafolin® is a registered trademark of Merck KGaA, Darmstadt, Germany.

Additional information

Role:

Folate is required for the formation of red blood cells, certain body proteins and genetic materials for the cell nucleus. It also helps to prevent macrocytic anaemia, a disease in which the blood cells grow larger than normal and have a shorter lifespan. Pregnant women and those anticipating pregnancy should increase their consumption of folic acid to 400 mcg to prevent birth defects, such as neural tube defects and spina bifida. Emerging science suggests it may play an important role in reducing risk of cardiovascular disease, dementia and certain cancers.

Food sources:

Folate, the natural form of Vitamin B9 is found in liver, legumes, peanuts, green leafy vegetables, orange juice and strawberries.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Infant health, Children & young adults, Healthy longevity, Maternal health, Women's health, Beauty from within, Active performance.

EU health claims:

- *Folate contributes to maternal tissue growth during pregnancy.*
- *Folate contributes to normal amino acid synthesis.*
- *Folate contributes to normal blood formation.*
- *Folate contributes to normal homocysteine metabolism.*
- *Folate contributes to normal psychological function.*
- *Folate contributes to the normal function of the immune system.*
- *Folate contributes to the reduction of tiredness and fatigue.*
- *Folate has a role in the process of cell division.*
- *Supplemental folic acid intake increases maternal folate status.*
- *Low maternal folate status is a risk factor in the development of neural tube defects in the developing fetus.*

Quali®-B / Vitamin B12 (Cyanocobalamin)

Additional information

Role:

Along with folate, Vitamin B12 is necessary for the formation of DNA and the production of healthy red blood cells. It also helps maintain the nervous system and is essential to maintaining mental function. The lack of Vitamin B12 in the body causes pernicious anemia. Vitamin B12, along with B6 and folate, is essential to Heart health.

Food sources:

Kidney, liver, shellfish, sardines, salmon, herring, egg yolks and nutritional yeast spread.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Eye health, Children & young adults, Healthy longevity, Maternal health, Men's health, Women's health, Vegetarians & vegans, Beauty from within, Active performance.

EU health claims:

- *Vitamin B12 contributes to normal energy-yielding metabolism.*
- *Vitamin B12 contributes to normal functioning of the nervous system.*
- *Vitamin B12 contributes to normal homocysteine metabolism.*
- *Vitamin B12 contributes to normal psychological function.*
- *Vitamin B12 contributes to normal red blood cell formation.*
- *Vitamin B12 contributes to the reduction of tiredness and fatigue.*
- *Vitamin B12 has a role in the process of cell division.*
- *Vitamin B12 contributes to the normal function of the immune system.*

Additional information | Vitamin C (L-Ascorbic Acid, Ascorbate)

Role:

Vitamin C aids the body in the production of collagen, a substance that provides support to muscles, vascular tissues, bones and cartilage. Vitamin C aids in the absorption of iron and also contributes to the health of teeth and gums. It is one of the most important water-soluble antioxidants in the body. Vitamin C is considered to enhance the immune response and play a protective role against cardiovascular disease, cataracts and certain types of cancer.

Food sources:

Citrus fruits, potatoes, broccoli, sweet peppers, kale, cabbage, cauliflower, tomatoes, strawberries and acerola.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Infant health, Healthy longevity, Children & young adults, Maternal health, Women's health, Vegetarians, Beauty from within, Active performance.

EU health claims:

- *Vitamin C contributes to normal collagen formation for the normal function of blood vessels.*
- *Vitamin C contributes to normal collagen formation for the normal function of bones.*
- *Vitamin C contributes to normal collagen formation for the normal function of cartilage.*
- *Vitamin C contributes to normal collagen formation for the normal function of gums.*
- *Vitamin C contributes to normal collagen formation for the normal function of skin.*
- *Vitamin C contributes to normal collagen formation for the normal function of teeth.*
- *Vitamin C contributes to normal energy-yielding metabolism.*
- *Vitamin C contributes to normal functioning of the nervous system.*
- *Vitamin C contributes to normal psychological function.*
- *Vitamin C contributes to the normal function of the immune system.*
- *Vitamin C contributes to the protection of cells from oxidative stress.*
- *Vitamin C contributes to the reduction of tiredness and fatigue.*
- *Vitamin C contributes to the regeneration of the reduced form of vitamin E.*
- *Vitamin C increases iron absorption.*

An API portfolio elevated by Verilege™

In the world of pharmaceutical innovation, managing the intricacies of regulatory compliance, ensuring ingredient quality, and meeting sustainability targets is a complex task. To help you enter, navigate, and expand in the pharmaceutical market with confidence and peace of mind, our API portfolio is elevated by Verilege™, a suite of expert services and superior customer care.

Verilege™ simplifies the drug approvals process by helping you:

- Navigate regulatory hurdles with ease.
- Count on consistent high-quality and pharma standards.
- Unlock new markets and opportunities.
- Progress health sustainably.
- De-risk your supply chain geographically.

Additional information | Vitamin A (Retinol)

Role:

Vitamin A is necessary for vision, growth and tissue differentiation. It helps protect the cell membrane structure and is important for keeping the skin, eyes, and inner linings of the body healthy and resistant to infection. Vitamin A is also responsible for hair health and the maintenance and growth of glands.

EU health claims:

- *Vitamin A contributes to normal iron metabolism.*
- *Vitamin A contributes to the maintenance of normal mucous membranes.*
- *Vitamin A contributes to the maintenance of normal skin.*
- *Vitamin A contributes to the maintenance of normal vision.*
- *Vitamin A contributes to the normal function of the immune system.*
- *Vitamin A has a role in the process of cell specialization.*

*US FDA 2019 label: 1 IU vitamin D = 0.025 mcg vitamin D. (•) Regional differences.

Additional information | Vitamin D3 (Cholecalciferol)

Role:

Vitamin D3 helps the body maintain and utilize the calcium and phosphorus needed to build strong bones and teeth. A deficiency of Vitamin D can result in rickets, a disease in which the bones become bent or twisted. It helps calcium to reduce the risk of osteoporosis. Vitamin D3 contributes to the normal function of the immune system and healthy inflammatory response and to the maintenance of normal muscle function.

EU health claims:

- *Vitamin D contributes to normal absorption/utilisation of calcium and phosphorus.*
- *Vitamin D contributes to normal blood calcium levels.*
- *Vitamin D contributes to the maintenance of normal bones.*
- *Vitamin D contributes to the maintenance of normal muscle function.*
- *Vitamin D contributes to the maintenance of normal teeth.*
- *Vitamin D contributes to the normal function of the immune system.*
- *Vitamin D has a role in the process of cell division.*
- *Vitamin D is needed for normal growth and development of bone in children.*
- *Calcium and vitamin D help to reduce the loss of bone mineral in post-menopausal women. Low bone mineral density is a risk factor for osteoporotic bone fractures.*
- *Vitamin D helps to reduce the risk of falling associated with postural instability and muscle weakness. Falling is a risk factor for bone fractures among men and women 60 years of age and older.*

† DMF / Pharma registered OTC (Over the Counter) / Rx (Prescription) statuses must be checked with local dsm-firmenich regulatory affairs team in your closest office. The applicability of the portfolio for pharmaceutical application is subject to local approval.

Additional information

Role:

Vitamin E helps protect cell membranes. It also helps maintain the immune system, prolong the life of red blood cells, maintain a healthy circulatory system and facilitate the body’s full utilization of vitamin A. Vitamin E is found in many body tissues – it is especially abundant in adipose tissue, liver, and muscle – and is important for their health and proper functioning. Vitamin E is an antioxidant and is considered to play a role in neutralizing free radicals. These highly reactive molecules are found in the body as a result of normal body processes and from external factors such as environmental pollution. Oxidative damage caused by these reactive molecules is considered to contribute to aging and age-related chronic diseases, such as cataracts, heart disease and cancer.

EU health claims:

- *Vitamin E contributes to the protection of cells from oxidative stress.*

† DMF / Pharma registered OTC (Over the Counter) / Rx (Prescription) statuses must be checked with local dsm-firmenich regulatory affairs team in your closest office. The applicability of the portfolio for pharmaceutical application is subject to local approval.

Vitamin K1 (Phylloquinone)

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
Vitamin K1 API** API with specific service package for pharma registered applications. Oily liquid	●	●	●		1	50 1322 4.264	●		●	●

**US DMF only.

Additional information

Role:

Vitamin K1 is essential for the clotting of blood; it is involved in the regulation of calcium within bones and helps maintain bone density. In a healthy person, bacteria in the intestine normally provide a substantial amount of this vitamin. A deficiency may occur in newborns and in people consuming antibacterial agents over a prolonged period. These people are frequently given vitamin K1 under a doctor’s care. Vitamin K1 can maintain bone health.

EU health claims:

- *Vitamin K contributes to normal blood clotting.*
- *Vitamin K contributes to the maintenance of normal bones.*

† DMF / Pharma registered OTC (Over the Counter) / Rx (Prescription) statuses must be checked with local dsm-firmenich regulatory affairs team in your closest office. The applicability of the portfolio for pharmaceutical application is subject to local approval.

Thiamine mononitrate Ph API with specific service package for pharma registered applications. Coated	●	●	●	●	20	50 1841 4.341		●	●	●

**Only in North America.

Additional information

Role:

Thiamine is required to help the body use its major source of energy, carbohydrates, to the fullest extent. Thiamine is also essential for proper muscle coordination, the maintenance of peripheral nerve tissue and for normal growth.

EU health claims:

- *Thiamine contributes to normal energy-yielding metabolism.*
- *Thiamine contributes to normal functioning of the nervous system.*
- *Thiamine contributes to normal psychological function.*
- *Thiamine contributes to the normal function of the heart.*

Vitamin B2 (Riboflavin)

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
Riboflavin 5'-Phosphate Ph API with specific service package for pharma registered applications	●	●	●	●	1 5	50 1751 3.608 50 1751 3.605		●	●	●
Riboflavin Universal Ph API with specific service package for pharma registered applications	●	●	●	●	10	50 1775 4.231		●	●	●

Additional information

Role:

Riboflavin is important in helping the body transform proteins, fats and carbohydrates into energy. It helps maintain healthy skin and eyes and is also necessary for building and maintaining body tissues. It is also involved in the production of red blood cells, which are responsible for transporting oxygen throughout the body and it plays a role in the function of the nervous system.

EU health claims:

- *Riboflavin contributes to normal energy-yielding metabolism.*
- *Riboflavin contributes to normal functioning of the nervous system.*
- *Riboflavin contributes to the maintenance of normal mucous membranes.*
- *Riboflavin contributes to the maintenance of normal red blood cells.*
- *Riboflavin contributes to the maintenance of normal skin.*
- *Riboflavin contributes to the maintenance of normal vision.*
- *Riboflavin contributes to the normal metabolism of iron.*
- *Riboflavin contributes to the protection of cells from oxidative stress.*
- *Riboflavin contributes to the reduction of tiredness and fatigue.*

*US FDA 2019 label: 1 mg niacin = 1 mg niacin equivalents (NE); **Only for China. ***DMF / Pharma registered OTC (Over the Counter) / Rx (Prescription) statuses must be checked with local dsm–firmenich regulatory affairs team in your closest office. The applicability of the portfolio for pharmaceutical application is subject to local approval.

Additional information

Role:

Essential for the metabolism of carbohydrates, fats, and proteins. Niacin also plays a role in other metabolic processes in the body, including cellular metabolism, nervous system function, cardiovascular health, skin health, and digestive health. It is involved in the conversion of food to energy.

EU health claims:

- *Niacin contributes to normal energy–yielding metabolism.*
- *Niacin contributes to normal functioning of the nervous system.*
- *Niacin contributes to normal psychological function.*
- *Niacin contributes to the maintenance of normal mucous membranes.*
- *Niacin contributes to the maintenance of normal skin.*
- *Niacin contributes to the reduction of tiredness and fatigue.*

Additional information

Role:

Pantothenic acid is essential for the formation of certain neurotransmitter function and hormones. It is also required for metabolism of proteins, fats and carbohydrates.

EU health claims:

- *Pantothenic acid contributes to normal energy-yielding metabolism.*
- *Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.*
- *Pantothenic acid contributes to the reduction of tiredness and fatigue.*
- *Pantothenic acid contributes to normal mental performance.*

Vitamin B6 (Pyridoxine)

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
Pyridoxine Hydrochloride Ph API with specific service package for pharma registered applications.	●	●	●	●	20	50 1646 0.340 (Origin: Germany)		●	●	●
ROCOAT® Pyridoxine Hydrochloride 33 1/3% API with specific service package for pharma registered applications. Coated	●	●			5 50**	04 2945 7.304 04 2945 7.402		●	●	●

**Only for North America.

Additional information

Role:

Pyridoxine is necessary for energy metabolism, the metabolism of amino acids and the building blocks of proteins. It also helps the nervous system to function properly and is essential to a healthy immune system. Vitamin B6, along with folate and vitamin B12, is essential to Heart health. It is involved in the synthesis of hemoglobin, the protein responsible for carrying oxygen in red blood cells.

EU health claims:

- *Vitamin B6 contributes to normal cysteine synthesis.*
- *Vitamin B6 contributes to normal energy-yielding metabolism.*
- *Vitamin B6 contributes to normal functioning of the nervous system.*
- *Vitamin B6 contributes to normal homocysteine metabolism.*
- *Vitamin B6 contributes to normal protein and glycogen metabolism.*
- *Vitamin B6 contributes to normal psychological function.*
- *Vitamin B6 contributes to normal red blood cell formation.*
- *Vitamin B6 contributes to the normal function of the immune system.*
- *Vitamin B6 contributes to the reduction of tiredness and fatigue.*
- *Vitamin B6 contributes to the regulation of hormonal activity.*

Vitamin B7 (Biotin, Vitamin B8, Vitamin H)

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
D-Biotin Ph API with specific service package for pharma registered applications.	●	●	●		0.05 1 (pouch) 25	50 1626 4.240 50 1626 4.268 50 1626 4.372		●	●	●
Biotin 1% Trit Ph API with specific service package for pharma registered applications.	●		●**		25	50 1728 9.368		●	●	●

** In preparation

Additional information

Role:

Biotin is necessary for synthesizing fatty acids and involved in the metabolism of carbohydrates, fats and proteins. It also helps in the maintenance of the nervous system, skin, regulation gene expression and blood sugar.

EU health claims:

- *Biotin contributes to normal energy-yielding metabolism.*
- *Biotin contributes to normal functioning of the nervous system.*
- *Biotin contributes to normal macronutrient metabolism.*
- *Biotin contributes to normal psychological function.*
- *Biotin contributes to the maintenance of normal hair.*
- *Biotin contributes to the maintenance of normal mucous membranes.*
- *Biotin contributes to the maintenance of normal skin.*

† DMF / Pharma registered OTC (Over the Counter) / Rx (Prescription) statuses must be checked with local dsm-firmenich regulatory affairs team in your closest office. The applicability of the portfolio for pharmaceutical application is subject to local approval.

Vitamin B9 (Folate, Folic Acid)**

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
Folic Acid Ph API with specific service package for pharma registered applications.	●	●	●	●	1	50 1625 9.268		●	●	●
					25	50 1625 9.372				

** US FDA 2018 label: 1 mcg folic acid = 0.6 mcg dietary folate equivalents (DFE).

Additional information

Role:

Folate is required for the formation of red blood cells, certain body proteins and genetic materials for the cell nucleus. It also helps to prevent macrocytic anaemia, a disease in which the blood cells grow larger than normal and have a shorter lifespan. Pregnant women and those anticipating pregnancy should increase their consumption of folic acid to 400 mcg to prevent birth defects, such as neural tube defects and spina bifida. Emerging science suggests it may play an important role in reducing risk of cardiovascular disease, dementia and certain cancers.

EU health claims:

- Folate contributes to maternal tissue growth during pregnancy.
- Folate contributes to normal amino acid synthesis.
- Folate contributes to normal blood formation.
- Folate contributes to normal homocysteine metabolism.
- Folate contributes to normal psychological function.
- Folate contributes to the normal function of the immune system.
- Folate contributes to the reduction of tiredness and fatigue.
- Folate has a role in the process of cell division.
- Supplemental folic acid intake increases maternal folate status.
- Low maternal folate status is a risk factor in the development of neural tube defects in the developing fetus.

† DMF / Pharma registered OTC (Over the Counter) / Rx (Prescription) statuses must be checked with local dsm-firmenich regulatory affairs team in your closest office. The applicability of the portfolio for pharmaceutical application is subject to local approval.

Vitamin B12 (Cyanocobalamin)

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
Vitamin B12 Crystalline Ph API with specific service package for pharma registered applications.	●	●	●	●	0.1	50 1630 0.252		●	●	●
Vitamin B12 1% Ph API with specific service package for pharma registered applications. Spray dried powder form.	●	●	●		5 20	50 1823 8.304 50 1823 8.341		●	●	●
Vitamin B12 0.1% Ph API with specific service package for pharma registered applications. Spray dried powder form.	●	●	●		5 15	50 1823 5.304 50 1823 5.281		●	●	●

Additional information

Role:

Along with folate, Vitamin B12 is necessary for the formation of DNA and the production of healthy red blood cells. It also helps maintain the nervous system and is essential to maintaining mental function. The lack of Vitamin B12 in the body causes pernicious anemia. Vitamin B12, along with B6 and folate, is essential to Heart health.

EU health claims:

- *Vitamin B12 contributes to normal energy-yielding metabolism.*
- *Vitamin B12 contributes to normal functioning of the nervous system.*
- *Vitamin B12 contributes to normal homocysteine metabolism.*
- *Vitamin B12 contributes to normal psychological function.*
- *Vitamin B12 contributes to normal red blood cell formation.*
- *Vitamin B12 contributes to the reduction of tiredness and fatigue.*
- *Vitamin B12 has a role in the process of cell division.*
- *Vitamin B12 contributes to the normal function of the immune system.*

Additional information | Vitamin C (L-Ascorbic Acid, Ascorbate)

Role:

Vitamin C aids the body in the production of collagen, a substance that provides support to muscles, vascular tissues, bones and cartilage. Vitamin C aids in the absorption of iron and also contributes to the health of teeth and gums. It is one of the most important water-soluble antioxidants in the body. Vitamin C is considered to enhance the immune response and play a protective role against cardiovascular disease, cataracts and certain types of cancer.

EU health claims:

- *Vitamin C contributes to normal collagen formation for the normal function of blood vessels.*
- *Vitamin C contributes to normal collagen formation for the normal function of bones.*
- *Vitamin C contributes to normal collagen formation for the normal function of cartilage.*
- *Vitamin C contributes to normal collagen formation for the normal function of gums.*
- *Vitamin C contributes to normal collagen formation for the normal function of skin.*
- *Vitamin C contributes to normal collagen formation for the normal function of teeth.*
- *Vitamin C contributes to normal energy-yielding metabolism.*
- *Vitamin C contributes to normal functioning of the nervous system.*
- *Vitamin C contributes to normal psychological function.*
- *Vitamin C contributes to the normal function of the immune system.*
- *Vitamin C contributes to the protection of cells from oxidative stress.*
- *Vitamin C contributes to the reduction of tiredness and fatigue.*
- *Vitamin C contributes to the regeneration of the reduced form of vitamin E.*
- *Vitamin C increases iron absorption.*

β-Carotene (Pro-Vitamin A)

Product and Description	Certifications				Pack size (kg)	Product code	Form		Main application	
	Kosher	Halal	DMF	CEP			Liquid	Powder	Pharma reg. OTC/Rx†	Vegetarian
β-Carotene Crystalline Ph API with specific service package for pharma registered applications.	●	●		●	0.25	50 1434 4.258		●	●	
BetaTab® 20% S Ph API with specific service package for pharma registered applications. Beadlet†, cold water dispersible	●	●			25	50 1435 2.368		●	●	
β-Carotene 30% FS Ph API with specific service package for pharma registered applications. Fluid suspension	●	●			5	50 1438 7.294	●		●	

Additional information | β-Carotene

Role:

β-Carotene serves as an important source of vitamin A and is converted into vitamin A as the body needs it. The additional health promoting effects of β-Carotene may be due to its ability to act as an antioxidant when consumed at dietary intake levels.

EU health claims:

- *Vitamin A contributes to normal iron metabolism.*
- *Vitamin A contributes to the maintenance of normal mucous membranes.*
- *Vitamin A contributes to the maintenance of normal skin.*
- *Vitamin A contributes to the maintenance of normal vision.*
- *Vitamin A contributes to the normal function of the immune system.*
- *Vitamin A has a role in the process of cell specialization.*

Additional information | *life'sDHA*[™] (omega-3 oils)

Role:

DHA, an omega-3 fatty acid, is a major structural fat in the brain and eyes. It accounts for up to 97% of the omega-3 fats in the brain and up to 93% of the omega-3 fats in the eye. A growing body of research continues to support the important role that DHA plays for both mother and baby. DHA is important for optimal infant brain, eye and nervous system development. Has been shown to support healthy pregnancy and cardiovascular health. DHA also supports brain function in adults.

Food sources:

The primary dietary source of DHA is fatty fish. Dietary sources for infants include breast milk and DHA-/ARA-fortified infant formula. Unfortunately, women of childbearing age who consume a typical Western diet are at risk for low stores of DHA.

Health benefits & solutions:

Brain health, Heart health, Eye health, Infant health, Healthy longevity, Children & young adults, Maternal health, Men's health, Women's health, Vegetarians & vegans, Active performance.

EU health claims:

- *DHA contributes to maintenance of normal brain function.*
- *DHA contributes to the maintenance of normal blood triglyceride levels.*
- *DHA contributes to the maintenance of normal vision.*
- *DHA intake contributes to the normal visual development of infants up to 12 months of age.*
- *DHA maternal intake contributes to the normal brain development of the fetus and breastfed infants.*
- *DHA maternal intake contributes to the normal development of the eye of the fetus and breastfed infants.*

Additional information | *life's™ OMEGA* (omega-3 oils)

Role:

These oils, produced from microalgae, contain eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). Recent research has shown these compounds to have triglyceride lowering activity, which may be helpful in reducing the risk of cardiovascular diseases.

Food sources:

The primary dietary source of DHA and EPA is fatty fish.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Eye health, Healthy longevity, Vegetarians & vegans, Beauty from within, Active performance.

EU health claims:

- *DHA and EPA contribute to the maintenance of normal blood pressure.*
- *DHA and EPA contribute to the maintenance of normal blood triglyceride levels.*
- *EPA and DHA contribute to the normal function of the heart.*

US qualified health claims:

- *Supportive, but not conclusive, research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. One serving of [Name of the food] provides [] gram of EPA and DHA omega-3 fatty acids [See nutrition information for total fat, saturated fat, and cholesterol content].*

Note: Dietary supplements may declare the amount of EPA and DHA per serving in “Supplement Facts”, instead of making the declaration in the claim. Claim is available in a total of six variations.

life's™ARA (Vegetarian Omega-6 Long Chain Polyunsaturated Fatty Acids)

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian

life's™DHA+ARA (Vegetarian Omega-3 and Omega-6 Long Chain Polyunsaturated Fatty Acids)

Formulaid™-B (2:1 ARA:DHA) From fungi and microalgae, containing 2 parts ARASCO® and 1 part DHASCO®-B	●	●	9 18 200	50 1559 0.043 50 1559 0.044 50 1559 0.046	●				●	●	●	●	●
Formulaid™-B (1:1 ARA:DHA) From fungi and microalgae, containing 1 part ARASCO® and 1 part DHASCO®-B	●	●	9 18 200	50 1591 9.043 50 1591 9.044 50 1591 9.046	●				●	●	●	●	●

Additional information | life's™ARA (omega-6 oils)

Role:

ARA (arachidonic acid), a long-chain omega-6 fatty acid, is the principal omega-6 in the brain and is abundant in other cells throughout the body. It is also a precursor to a group of hormone-like substances called eicosanoids that play a role in immunity, blood clotting and other vital functions in the body. Like DHA, ARA occurs naturally in breast milk and is important to infant development.

Food sources:

Dietary sources for infants include breast milk and DHA-/ARA-fortified infant formula. Most women receive adequate amounts of ARA by eating foods that are plentiful in the Western diet, such as meat, eggs and milk.

Health benefits & solutions:

Infant health.

MEG-3® (Marine Omega-3 Long Chain Polyunsaturated Fatty Acids)

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application

Additional information | MEG-3® (omega-3 oils)

Role:

MEG-3® contains eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). Research has shown these compounds to have triglyceride lowering activity, which may be helpful in reducing the risk of cardiovascular diseases. Depending on the EPA/DHA ratio, various health claims may apply.

Food sources:

The primary dietary source of DHA and EPA is fatty fish.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Eye health, Healthy longevity, Vegetarians, Beauty from within, Active performance.

EU health claims:

- *DHA and EPA contribute to the maintenance of normal blood pressure.*
- *DHA and EPA contribute to the maintenance of normal blood triglyceride levels.*
- *DHA contributes to maintenance of normal brain function.*
- *DHA contributes to the maintenance of normal blood triglyceride levels.*
- *DHA contributes to the maintenance of normal vision.*
- *EPA and DHA contribute to the normal function of the heart.*
- *DHA intake contributes to the normal visual development of infants up to 12 months of age.*
- *DHA maternal intake contributes to the normal brain development of the fetus and breastfed infants.*
- *DHA maternal intake contributes to the normal development of the eye of the fetus and breastfed infants.*

US qualified health claims:

- *Supportive, but not conclusive, research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. One serving of [Name of the food] provides [] gram of EPA and DHA omega-3 fatty acids [See nutrition information for total fat, saturated fat, and cholesterol content].*

Note: Dietary supplements may declare the amount of EPA and DHA per serving in “Supplement Facts”, instead of making the declaration in the claim. Claim is available in a total of six variations.

All-Q® / Coenzyme Q10

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
All-Q® (Coenzyme Q10) 10% CWS/S Beadlet,†† cold water dispersible. Starch-based	●	●	5 25	50 0416 0.304 50 0416 0.368		●	●	●					●

†† Product formulations which utilise Actilease® beadlet technology. Actilease® improves absorption and eases handling.

Additional information

Role:

Coenzyme Q10 (CoQ10) has antioxidant activity and is involved in energy metabolism in all cells in the body. Studies in individuals with cardiovascular disease, in particular those with heart failure and hypertension, report the most consistent improvement in symptoms when CoQ10 is taken as a supplement.

Food sources:

Beef, chicken, pork, herring, and trout; lesser amounts in some vegetables such as broccoli and cauliflower.

Health benefits & solutions:

Heart health, Healthy longevity, Men’s health, Active performance.

Fabules® / Specialty emulsion for satiety – Naturally sourced

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
Fabules® DE Fine powder, 33% functional lipid content	●	●	20	51 1400 0.341		●	●	●					●

Additional information

Role:

Fabules® is a patent-protected combination of palm and oat oil (both naturally occurring lipids) that is formulated in an emulsion. It’s microstructure aids in early gut health and triggers an “appetite satisfied” signal to the brain, therefore helping people to manage their calorie intake. Fabules® can be incorporated in foods or marketed as a Weight management supplement.

Health benefits & solutions:

Weight management.

Metafolin® / The naturally-occurring predominant form of folate

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
Metafolin®	●	●	1 0.1	50 1557 1.270 50 1557 1.074		●	●	●					●

Metafolin® is a registered trademark of Merck KGaA, Darmstadt, Germany.

Additional information

Role:

There are primarily two forms of folate, folic acid and methylfolate. Metafolin® is identical to methylfolate. Folic acid is the synthetic form found in many dietary supplements and fortified foods. After absorption, It must go through a series of enzymatic processes to convert to the active form, methylfolate (Metafolin®). Depending on the population, up to half of people have limited ability to convert folic acid to methylfolate (Metafolin®).

Methylfolate is one of the forms found naturally in foods. Since it is already in the active form, it does not need to be converted. Methylfolate is the form found in red blood cells. It is also more bioavailable and absorbed faster than folic acid. Additionally, unlike folic acid, Metafolin does not mask vitamin B12 deficiency and does not cause accumulation of unmetabolized folic acid in the body.

Food sources:

Dark green leafy vegetables (spinach, kale, broccoli, asparagus, brussel sprouts), legumes, whole grains, fruits/berries and their juices, eggs.

Health benefits & solutions:

Brain health, Heart health, Immunity, Infant health.

EU health claims:

- *Folate contributes to maternal tissue growth during pregnancy.*
- *Folate contributes to normal amino acid synthesis.*
- *Folate contributes to normal blood formation.*
- *Folate contributes to normal homocysteine metabolism.*
- *Folate contributes to normal psychological function.*
- *Folate contributes to the normal function of the immune system.*
- *Folate contributes to the reduction of tiredness and fatigue.*
- *Folate has a role in the process of cell division.*

PeptoPro® / Dairy-based peptides – Naturally sourced

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
PeptoPro® Powder	●	●	15	50 0714 3.201		●	●	●					●

Additional information

Role:

PeptoPro® is a highly hydrolyzed enzymatic digest of casein, manufactured utilizing a proprietary mix of enzymes to provide a high-quality source of peptides with excellent taste. High levels of di- and tripeptides, in combination with a low level of free amino acids, provide PeptoPro® with excellent nutritional value, instant solubility and low levels of bitterness. Human studies have proven that PeptoPro® plays an important role in sports applications, such as endurance, performance and muscle recovery. PeptoPro® qualifies as a superior protein source to cover daily needs of protein. An adequate amount of protein is important for muscle maintenance in older consumers.

Food sources:

Dairy.

Health benefits & solutions:

Mobility, Healthy longevity, Active performance.

EU health claims:

- *Protein contributes to a growth in muscle mass.*
- *Protein contributes to the maintenance of muscle mass.*

resVida® / High-purity trans-resveratrol

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
resVida® Crystalline powder, min. 99% trans-resveratrol	●	●	1 5 20	50 1439 5.268 50 1439 5.304 50 1439 5.344		●	●	●					●

Additional information

Role:

Resveratrol is a polyphenol produced by plants to protect them from environmental stress. It has antioxidant activity and is most known as the component in red wine that may confer Heart health benefits in the French population, despite a high fat intake, i.e. the French Paradox. Recent studies demonstrate resveratrol mimics the effect of caloric restriction, the only known intervention to extend lifespan in mammals. Resveratrol has been shown to improve blood flow may improve cognitive function.

Food sources:

Wine, grapes, peanuts and berries.

Health benefits & solutions:

Brain health, Heart health, Immunity, Healthy longevity.

geniVida® / High-purity genistein

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
geniVida® Crystalline powder, minimum 98.5% genistein	●	●	1 5	50 1632 4.268 50 1632 4.304		●	●						●

Additional information

Role:

Genistein is an isoflavone found in soybeans, soy flour, soy milk, soy protein concentrate (water washed) and soy protein isolates, that has the ability to bind selectively to the estrogen alpha and beta receptors and modulate gene expression. geniVida® can aid in restoring the balance between the bone-building osteoblasts and the bone-dissolving osteoclasts and help to maintain healthy bone density in postmenopausal women. Genistein has also been clinically proven to reduce menopausal symptoms, including hot flashes.

Food sources:

Soybeans, soy flour, soy milk, soy protein concentrate (water washed), soy protein isolates, miso, tempeh, tofu and foods made with these ingredients.

Health benefits & solutions:

Mobility, Healthy longevity, Women's health, Beauty from within.

Additional information | β-Carotene

Role:

β-Carotene serves as an important source of vitamin A and is converted into vitamin A as the body needs it. The additional health promoting effects of β-Carotene may be due to its ability to act as an antioxidant when consumed at dietary intake levels.

Food sources:

Dark green leafy vegetables and dark yellow / orange fruits and vegetables.

Health benefits & solutions:

Health from the gut, Immunity, Eye health, Children & young adults, Healthy longevity, Maternal health, Vegetarians & vegans, Beauty from within.

EU health claims:

- *Vitamin A contributes to normal iron metabolism.*
- *Vitamin A contributes to the maintenance of normal mucous membranes.*
- *Vitamin A contributes to the maintenance of normal skin.*
- *Vitamin A contributes to the maintenance of normal vision.*
- *Vitamin A contributes to the normal function of the immune system.*
- *Vitamin A has a role in the process of cell specialization.*

* Product formulations which utilise Actilease® beadlet technology. Actilease® combines easy handling, bioavailability, and stability of the active. ** Only for North America.

Additional information

Role:

Apocarotenal may be used in some regions as a food additive coloring properties.

Food sources:

Citrus fruits such as oranges and green leafy vegetables such as spinach.

AstaSana™ / Astaxanthin

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application							Color
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian	
AstaSana™ 5% CWS/S-TG Beadlet®, cold water dispersible	●	●	5	50 1637 8		●	●				●		●	Violet

* Product formulations which utilise Actilease® beadlet technology. Actilease® combines easy handling, bioavailability, and stability of the active.

Additional information

Role:

Astaxanthin has antioxidant properties. Its antioxidant protection can complement the performance of other antioxidants in dietary supplements, making it an ideal addition to eye, heart, skin and immune health formulations.

Food sources:

Astaxanthin is present in most red-colored aquatic organisms, such as krills, algae (*Haematococcus pluvialis*), shrimps and yeast (*Phaffia rhodozyma*).

Health benefits & solutions:

Mobility, Heart health, Immunity, Eye health, Beauty from within.

Canthaxanthin

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application							Color

Canthaxanthin 10% CWS/S Beadlet®, cold water dispersible. Starch-based	●	●	1 5 20	50 0525 6.268 50 0525 6.304 50 0525 6.341		●		●					●	Orange-Red to Red

* Product formulations which utilise Actilease® beadlet technology. Actilease® combines easy handling, bioavailability, and stability of the active.

Additional information

Role:

Canthaxanthin is a widely distributed pigment in nature and may be used as a food additive with coloring properties in some regions.

Food sources:

Green algae, crustaceans, and bioaccumulates in fish.

FloraGLO® and Macu-LZ™ are trademarks of Kemin Industries, Inc. * Product formulations which utilise Actilease® beadlet technology. Actilease® combines easy handling, bioavailability, and stability of the active. ** Only for North America.

Additional information | FloraGLO® / Lutein – Naturally sourced

Role:

Lutein and Zeaxanthin are natural yellow pigments found in cellular membranes, which cannot be produced by the body, but rather must be absorbed from the diet. These carotenoids absorb blue light and act as free radical scavengers in vitro. Lutein and Zeaxanthin are naturally found in maternal placenta and cord blood, as well as in colostrum and breast milk; they are structural components of the human eye and brain.

Food sources:

Dark green leafy vegetables such as cabbage (outside leaves), spinach, parsley, greens, and other vegetables such as watercress, peas, broccoli, lettuce, peppers, and other yellow/orange fruits.

Health benefits & solutions:

Brain health, Eye health, Infant health, Children & young adults.

Additional information

Role:

Lycopene is the carotenoid responsible for the red color in tomatoes and is the most abundant carotenoid in human serum. With its antioxidant activity, lycopene helps to protect our bodies from free radicals, which can not only cause damage to body cells but also play a role in serious illnesses. Several epidemiological studies have associated lycopene with a reduced risk of prostate cancer and cardiovascular disease.

Food sources:

Tomato and a variety of red fruits and vegetables, such as watermelon, pink grapefruit and guava.

Health benefits & solutions:

Heart health, Healthy longevity, Maternal health, Men's health, Beauty from within.

OPTISHARP® / Zeaxanthin – Naturally sourced

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application							Color
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian	
OPTISHARP® Natural (Zeaxanthin) 5% CWS/S-TG Spray granulated powder, cold water dispersible. Starch-based	●	●	10	50 1579 9.141		●	●	●			●	●	●	
OPTISHARP® Natural (Zeaxanthin) 14% Safflower Oil Fluid suspension	●	●	1 25	50 1576 6.263 50 1576 6.298	●		●	●			●	●	●	

Additional information

Role:

Lutein and Zeaxanthin are natural yellow pigments found in cellular membranes, which cannot be produced by the body, but rather must be absorbed from the diet. These carotenoids absorb blue light and act as free radical scavengers *in vitro*. Lutein and Zeaxanthin are naturally found in maternal placenta and cord blood, as well as in colostrum and breast milk; they are structural components of the human eye and brain.

Food sources:

Dark green leafy vegetables such as spinach, turnip and collard greens, lettuce and kale, and other vegetables such as persimmons, corn and peppers, and yellow/orange fruits such as mandarine and tangerine.

Health benefits & solutions:

Brain health, Eye health, Healthy longevity, Beauty from within.

Minerals

- › Copper Sulfate
- › Ferrous Sulfate
- › Potassium Iodide
- › Manganese Sulfate
- › Zinc Sulfate
- › Sodium Selenite

Copper Sulfate

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Copper sulfate SD 1.5% Cu An aqueous solution of mineral encapsulated with glucose syrup is atomized in a spray drier. Starch based. Contains min 1.5% Copper. Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1644 3.340		●	●	● 0.05kg pack	●	●		●

Additional information

Role:

Copper is an essential nutrient for the body. Together with iron, it enables the body to form red blood cells. It helps maintain healthy bones, blood vessels, nerves, and immune function, and it contributes to iron absorption. Sufficient copper in the diet may help prevent cardiovascular disease and osteoporosis.

Food sources:

Found in highest amounts in protein foods like organ meats, shellfish, fish, nuts, and seeds as well as whole grains and chocolate.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Beauty from within, Active performance.

EU health claims:

- *Copper contributes to maintenance of normal connective tissues.*
- *Copper contributes to normal energy-yielding metabolism.*
- *Copper contributes to normal functioning of the nervous system.*
- *Copper contributes to normal hair pigmentation.*
- *Copper contributes to normal iron transport in the body.*
- *Copper contributes to normal skin pigmentation.*
- *Copper contributes to the normal function of the immune system.*
- *Copper contributes to the protection of cells from oxidative stress.*

Ferrous Sulfate

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Ferrous sulfate SD 3% Fe An aqueous solution of mineral, stabilized with citric acid, encapsulated with glucose syrup is atomized in a spray drier. Starch based. Contains min 3% Iron. Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1644 4.340		●	●	●	●	●		●

Additional information

Role:

Iron is a mineral that the body needs for growth and development. Your body uses iron to synthesize hemoglobin, a protein in red blood cells that carries oxygen from the lungs to all parts of the body, and myoglobin, a protein that provides oxygen to muscles. Your body also needs iron to synthesize some hormones.

Food sources:

Liver (but avoid this during pregnancy), red meat, beans, such as red kidney beans, edamame beans and chickpeas, nuts, dried fruit – such as dried apricots, fortified breakfast cereals, soy bean flour.

Health benefits & solutions:

Brain health, Immunity, Women’s health, Vegetarians & vegans, Active performance.

EU health claims:

- *Iron contributes to normal cognitive function.*
- *Iron contributes to normal energy-yielding metabolism.*
- *Iron contributes to normal formation of red blood cells and haemoglobin.*
- *Iron contributes to normal oxygen transport in the body.*
- *Iron contributes to the normal function of the immune system.*
- *Iron contributes to the reduction of tiredness and fatigue.*
- *Iron has a role in the process of cell division.*

Potassium Iodide

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Potassium Iodide SD 0.25% I An aqueous solution of mineral encapsulated with glucose syrup is atomized in a spray drier. Starch based. Contains min 0.25% Iodide. Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1644 5.340		●	●	●	●	●		●

Additional information

Role:

Iodine helps the thyroid gland to make the hormone thyroxine. Thyroxine is important for the growth of bones and nerves, and how proteins, fats and carbohydrates are used in the body. Iodine is important before birth and in babies and young children. It is particularly important during pregnancy, when sufficient maternal intake is vital for healthy fetal and infant development. Iodine deficiency is the leading cause of goiter, which is the enlargement of the thyroid gland.

Food sources:

Beans, nuts, dairy foods, fish, seaweed and shellfish.

Health benefits & solutions:

Brain health, Infant health, Beauty from within, Active performance.

EU health claims:

- *Iodine contributes to normal cognitive function.*
- *Iodine contributes to normal energy-yielding metabolism.*
- *Iodine contributes to normal functioning of the nervous system.*
- *Iodine contributes to the maintenance of normal skin.*
- *Iodine contributes to the normal production of thyroid hormones and normal thyroid function.*

Manganese Sulfate

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Manganese sulfate SD 0.1% Mn An aqueous solution of mineral encapsulated with glucose syrup is atomized in a spray drier. Starch based. Contains min 0.1% Manganese. Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1644 6.340		●	●	●	●	●		●

Additional information

Role:

Manganese helps the body form connective tissue, bones, blood clotting factors, and sex hormones. It also plays a role in fat and carbohydrate metabolism, calcium absorption, and blood sugar regulation. Manganese is also necessary for normal brain and nerve function.

Food sources:

Shellfish (mussels, oysters, clams), nuts (especially hazelnuts and pecans), brown rice, oatmeal, legumes (soybeans, kidney beans, chickpeas, lentils, peanuts), black tea, spinach.

Health benefits & solutions:

Mobility, Heart health, Immunity, Active performance

EU health claims:

- *Manganese contributes to normal energy-yielding metabolism.*
- *Manganese contributes to the maintenance of normal bones.*
- *Manganese contributes to the normal formation of connective tissue.*
- *Manganese contributes to the protection of cells from oxidative stress.*

Zinc Sulfate

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Zinc sulfate SD 3% Zn An aqueous solution of mineral encapsulated with glucose syrup is atomized in a spray drier. Starch based. Contains min 3% Zinc. Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1644 7.340		●	●	●	●	●		●

Additional information

Role:

Zinc, a nutrient found throughout your body, helps your immune system and metabolism function. Zinc is also important to wound healing and your sense of taste and smell.

Food sources:

Oysters, but it's also plentiful in red meat and poultry. Other good sources are beans, nuts, crab, lobster, whole grains, breakfast cereals, and dairy products.

Health benefits & solutions:

Brain health, Mobility, Heart health, Immunity, Eye health, Men's health, Women's health, Beauty from within, Active performance.

EU health claims:

- Zinc contributes to normal DNA synthesis.
- Zinc contributes to normal acid-base metabolism.
- Zinc contributes to normal carbohydrate metabolism.
- Zinc contributes to normal cognitive function.
- Zinc contributes to normal fertility and reproduction.
- Zinc contributes to normal macronutrient metabolism.
- Zinc contributes to normal metabolism of fatty acids.
- Zinc contributes to normal metabolism of vitamin A.
- Zinc contributes to normal protein synthesis.
- Zinc contributes to the maintenance of normal bones.
- Zinc contributes to the maintenance of normal hair.
- Zinc contributes to the maintenance of normal nails.
- Zinc contributes to the maintenance of normal skin.
- Zinc contributes to the maintenance of normal testosterone levels in the blood.
- Zinc contributes to the maintenance of normal vision.
- Zinc contributes to the normal function of the immune system.
- Zinc contributes to the protection of cells from oxidative stress.
- Zinc has a role in the process of cell division.

Sodium Selenite

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application					
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Vegetarian
Dried Food Powder SD 0.02% Se An aqueous solution of mineral encapsulated with glucose syrup is atomized in a spray drier. Starch based. Contains min 0.02% Selenium. Does not contain a flow agent, e.g. silicon dioxide.	●	●	20	50 1771 3.340		●	●	●	●	●		●

Additional information

Role:

Selenium is an essential trace mineral that the body needs to stay healthy. It is important for the reproduction, thyroid gland function, plays a role in protecting DNA from damage and supporting DNA repair processes, muscle health and protecting the body from damage caused by free radicals and infection. Selenium also supports immune health.

Food sources:

The richest sources of selenium are animal derived foods such as organ and muscle meat, eggs and dairy products, although some plant-based foods such as Brazil nuts and grains also contain selenium.

Health benefits & solutions:

Brain health, Heart health, Immunity, Infant health, Healthy longevity, Children & young adults, Men's health, Women's health.

EU health claims:

- *Selenium contributes to normal spermatogenesis.*
- *Selenium contributes to the maintenance of normal hair.*
- *Selenium contributes to the maintenance of normal nails.*
- *Selenium contributes to the normal function of the immune system.*
- *Selenium contributes to the normal thyroid function.*
- *Selenium contributes to the protection of cells from oxidative stress.*

Hydrocolloids (pectin)

PECTNER™ / Pectin

Product and Description	Certifications		Pack Size (kg)	Product Code	Specific application						
	Kosher	Halal			Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
PECTNER™ APC102	●	●	25	5018202375	●	●		●	●	●	●
PECTNER™ APC104	●	●	25	5018203375	●	●		●	●	●	●
PECTNER™ APC105	●	●	25	5018204375	●	●		●	●	●	●
PECTNER™ APC169B	●	●	25	5018205375	●	●		●	●	●	●
PECTNER™ APC210	●	●	25	5018206375	●	●		●	●	●	●

PECTNER™ is a trademark of Yantai DSM Andre Pectin Co Ltd, a joint venture controlled by dsm-firmenich

Additional information

Role:

Pectin is a soluble dietary fiber that occurs in fruit. Due to its hydrocolloid properties, Pectin can be used as a natural thickening and gelling agent. In addition, pectin supports gut health and can positively impact the gut microbiota. Soluble fibers may also delay glucose absorption in the small intestine which aids glycemic control.

Consumer preferences are rapidly shifting (e.g., product formats, vegetarian, etc.). New product experiences can drive compliance and attract new consumer groups. To support this consumer shift, we offer a range of pectin ingredients. Leveraging our experience in taste, texture, and health, we have extensive know-how in bringing tailored functionalities – from gelling and texturizing, to usage in functional dietary supplements.

Relevant functionalities of pectin include:

- *Vegan friendly gelatin replacement*
- *Thermally and pH stable texturizing agent*
- *Recognized for emulsifying and stabilizing properties*
- *Low-calorie prebiotic/fiber with increasing evidence on health benefits*
- *Good flavor release*

Food Sources:

Pectin is derived from the peels of apples and citrus fruits (upcycling from juice production).

Health benefits & solutions:

Heart health, Health from the gut, Vegetarians.

EU claims:

- *Pectins contribute to the maintenance of normal blood cholesterol levels.**
- *Consumption of pectins with a meal contributes to the reduction of the blood glucose rise after that meal.***

US FDA claim:

- *Approved as a dietary fiber.*

* In order to bear the claim, information shall be given to the consumer that the beneficial effect is obtained with a daily intake of 6 g of pectins.

** In order to bear the claim, information shall be given to the consumer that the beneficial effect is obtained by consuming 10 g of pectins as part of the meal.

Additional information | GLYCARE® / Human milk oligosaccharides (HMOs)

Role:

HMOs are non-digestible carbohydrates naturally found in human breast milk forming the third largest solid component of human milk. There are over 200 HMO structures that have been identified, but most occur at tiny quantity and about a dozen contributing the bulk. HMOs have been shown to positively shape the microbiome and developing immune system in infants. Emerging evidence suggests that HMOs may have health benefits beyond infancy and may support gut health and the immune system throughout the lifespan.

Food Sources:

HMOs are naturally present at large amounts in breastmilk. Some HMOs can also be found in the milk of farmed animals (e.g. cow, goat, sheep, camel), but at comparably much smaller amounts.

Health Benefits & Solutions:

Health from the gut, Immunity, Infant health.

Valuable effects of HMOs include promoting growth of beneficial intestinal bacteria thereby generating short-chain fatty acids which are critical for gut health. HMOs also directly modulate immune responses and can selectively reduce binding of pathogenic bacteria and viruses to the gut epithelium protecting against infection.

HMOs may also play a role in brain and cognitive development.

Biotics

- › Humiome® Vitamins
- › Humiome® Postbiotics
- › Humiome® Probiotics
- › ELN Probiotics

Humiome® Vitamins

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application							
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian	Vegan
Humiome® B2 with MTT™	●		1 5 25	50 1755 0.268 50 1755 0.304 50 1755 0.368		●	●				●		●	

MTT™ = Microbiome Targeted Technology; Product formulation utilizing MTT™. Combining easy handling, stability of the active and colon release.

Additional information

Role:

Humiome® B2 is the first biotic vitamin delivering Vitamin B2 to the colon via its MTT™ technology. MTT™ is designed to facilitate that large amounts of Humiome® B2 reaches the colon (~90%) while small fractions of Vitamin B2 (riboflavin) are expected to get released in the proximal intestine (~10%). Thus EC claims can still be applied. Humiome® B2 with MTT™ modulates the microbiome positively via increasing the microbiome diversity, contributes to intestinal homeostasis and enhances the resilience on top of the conventional claims known for riboflavin.

Food sources:

Milk, green vegetables, meat, fish, whole grains, cheese and eggs.

Health benefits & solutions:

Health from the gut, Immunity.

Emerging science biotic benefits:

- Humiome® B2 supports the growth of beneficial bacteria in the human colon.
- Humiome® B2 supports beneficial bacteria in their gut environment.
- Humiome® B2 could increase their functionality and production of colonic-butyrate.
- Humiome® B2 supports the communication between gut microbiome.
- Humiome® B2 helps to protect the environment from oxidative stress.
- Humiome® B2 helps to have a stronger gut defence (gut wall integrity).
- Humiome® B2 helps to nourish your second brain, your gut.

EU health claims:

- Riboflavin contributes to normal energy-yielding metabolism.
- Riboflavin contributes to normal functioning of the nervous system.
- Riboflavin contributes to the maintenance of normal mucous membranes.
- Riboflavin contributes to the maintenance of normal red blood cells.
- Riboflavin contributes to the maintenance of normal skin.
- Riboflavin contributes to the maintenance of normal vision.
- Riboflavin contributes to the normal metabolism of iron.
- Riboflavin contributes to the protection of cells from oxidative stress.
- Riboflavin contributes to the reduction of tiredness and fatigue.

Role:

Riboflavin is important in helping the body transform proteins, fats and carbohydrates into energy. It helps maintain healthy skin and eyes and is also necessary for building and maintaining body tissues.

Humiome® Postbiotics

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application							
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian	Vegan
Humiome® Post LB	●	●	20	50 1819 4.340		●	●				●	●	●	
Humiome® Post LB LF	●	●	20	50 1844 4.340		●	●				●	●	●	

Additional information

Role:

Postbiotics are a preparation of inanimate microorganisms and/or their components that confers a health benefit on the host.

Health benefits & solutions:

Immunity, Health from the gut.

Benefit claims:

- *Helps regular bowel movement and digestive comfort.*
- *Helps to regulate immunity.*
- *Supports & improves digestive health.*

Humiome® Probiotics

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application							
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods & Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian	Vegan
Humiome® L. rhamnosus GG (ATCC 53103)	●	●	4x 2,5	50 1820 9.172		●	●				●	●	●	●
Humiome® B. lactis DSM 34602	●	●	4x 2,5	50 1835 4.010		●	●				●		●	●
Humiome® L. plantarum DSM 34532	●	●	4x 2,5	50 1846 5.186		●	●				●		●	●

Additional information

Role:

Probiotics are live microorganisms that, when administered in adequate amounts, confer a health benefit on the host.

Health benefits & solutions:

Brain health, Health from the gut, Immunity, Healthy longevity.

Benefit claims:

- *May reduce the duration of acute diarrhea and enhance stool consistency in children and adults.*
- *May regulate the stool consistency (in elderly).*
- *May reduce the risk of developing respiratory infections (infants and children).*
- *Can promote cognitive health.*

ELN Probiotics

Additional information

Role:

Probiotic strains are live microorganisms that, when administered in adequate amounts, confer a health benefit to the host. Probiotic strains are naturally present in breastmilk and have been shown to shape the infant microbiome in the first three years of life – a critical window for its development, where the foundation for lifelong health is laid.

Food Sources:

Probiotic strains are naturally present in breastmilk. Probiotics can also be found in fermented foods, such as yoghurt, kefir, and cheese.

Health benefits & solutions:

Health from the gut, Immunity, Infant health.

Probiotics contribute to the foundation of lifelong health by colonizing the infant microbiome and supporting healthy growth and development, strengthening gut barrier function against pathogens, aiding in the development of the baby's immune system, and supporting the developing gut-brain axis.

Digestive Enzymes

Tolerase® G & Tolerase® L / Digestive enzymes

Product and Description	Certifications		Pack size (kg)	Product code	Form		Specific application						
	Kosher	Halal			Liquid	Powder	Dietary Supplements	Foods and Beverages	Early Life Nutrition	Medical Nutrition	Nutrition Improvement	Naturally Sourced	Vegetarian
Tolerase® G Prolyl oligopeptidase. Micro granulated powder, 580,000 PPI/g	●	●	5	50 1488 3.304		●	●						●
Tolerase® L Acid lactase. Micro granulated powder, 100,000 ALU/g	●	●	5	50 1454 9.304		●	●						●

Additional information

Role:

Tolerase® G is a micro granulated food enzyme preparation containing prolyl oligopeptidase. Some humans may lack enzymes which can fully digest proline-rich peptides, such as in gluten. Tolerase® G has been proven to degrade proline-rich gluten epitopes. It addresses the needs of consumers who want to reduce their dietary gluten exposure.

Tolerase® L is a micro-granulated food enzyme preparation containing acid lactase. Lactase is needed to digest lactose, which is the main carbohydrate source of dairy products. Since many adults don't produce enough lactase, lactose is not properly digested in the small intestine but fermented by the microbial flora in the large intestine. The resulting by-products cause diarrhoea, abdominal cramps, flatulence and nausea. The use of lactase can prevent these unpleasant side-effects of consuming dairy products. Acid lactase works especially well at low pH, making it particularly suitable to digest lactose in the stomach.

Health benefits & solutions:

Health from the gut.

EU health claims:

- *Lactase enzyme improves lactose digestion in individuals who have difficulty digesting lactose.*

Additional information | Labeling

Kosher and Halal certification

Typically our products have Kosher (OU) and the main Halal certifiers (IFANCA, HFCE, MUI). We occasionally use other certification organization as well, but these are typically for special cases or back-up. Information about the other available certificates may be available upon request.

Specific Product Information

Product Data Sheets and Safety Data Sheets are available for all products listed in this catalogue. They contain information on product description and identification, specification and stability and storage conditions.

Some of the listed products are used either as vitamins (nutrients / Active Pharmaceutical Ingredients / excipients) or as food additives for technological purposes; some of them serve both purposes and are authorized in most countries. However, there are local regulations according to which their use may be restricted. It is therefore advisable to consult the corresponding regulation.

For further information on our products (local availability and prices), please contact the DSM Nutritional Products' office nearest to you or one of the addresses listed on the back cover.

RSPO certification

DSM made a commitment in 2013 to source all palm oil and palm oil derivatives in a sustainable manner by either using GreenPalm certificates under "Book & Claim" scheme or Mass Balance certification.
