

Premix Solutions

Pioneering sustainability

dsm-firmenich takes you beyond ingredients to custom nutrient Premixes. Made with your consumers at the heart.

As your end-to-end partner, we help you co-develop desirable and sustainable science-backed solutions to support you from concept to consumer.

Together elevating health.

01

The problem

Your consumers don't want healthy products that harm our planet. They want responsible products from businesses who take their environmental footprint seriously.

What you need is a Premix that delivers the best of both worlds. A formula that best meets consumers' nutritional needs, against the lowest possible environmental footprint.

02

Our solution

Premixes that use nutrients and a first-of-its-kind impact calculator to help you reach your sustainability goals.

We proactively measure and reduce environmental impact. And we're setting the standard across our industry for products with purpose. With dsm-firmenich Premix, you can empower your consumers to make healthier choices for their bodies and our world.

Providing transparency on carbon footprints

With our Solution Imp'Act Calculator, we have the ability to provide full transparency on the total premix carbon footprint and which ingredients are being its major drivers.

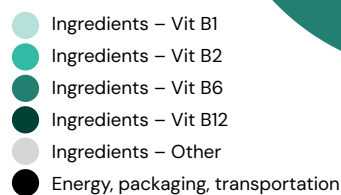

The carbon footprint is calculated from start to end, considering ingredients, operations, packaging, and transportation based on credible and preferably primary life cycle assessment (LCA) data, coming from in-house LCA studies conducted against a third party-reviewed ISO compliant LCA methodology.

This case study highlights a typical premix formulation for the dietary supplements market.

We are one of the first to market to provide the carbon footprint per 1 kg premix for our formulations, helping you to meet your environmental goals and to resonate deeper with consumers.

Example of Premix for dietary supplements

Insight in the ingredient carbon footprint (kg CO₂eq) per 1 kg premix

Insight in the drivers of the carbon footprint

Premix total carbon footprint (kg CO₂eq/kg premix)

A healthier world takes more than just ingredients. It takes an end-to-end purpose-led partner.

We bring progress to life.
