Digestarom® Prime

Better digestion for better feed efficiency!

Phytogenic feed additive specifically designed to enhance feed palatability

A healthy digestive tract is a prerequisite for overall animal health and performance. It not only affects the absorption and utilization of nutrients, but also has a considerable influence on the animal's immune system. Under the conditions of poor digestion, excessive amounts of nutrients are available for pathogenic bacteria to rapidly multiply in the digestive tract, which may easily result in enteric imbalances. Therefore, gut-friendly feeding is essential for promoting animal wellbeing and performance.

Active Ingredients:

The blend of essential oils, herbs, spices, and plant extracts work synergistically to increase the appetite in animals and palatability of feed.

Main benefits

- Encourages feed intake and supports digestibility
- Provides flexibility for least cost ration formulation
- Beneficial for all stages of growth/development
- No negative side effects or withdrawal periods
- Increases profitability

Application:

Digestarom® is incorporated into feed during compounding, before pelleting. It is stable under common conditions of pelleting and hygienization. Digestarom® can be incorporated into TMR.

Dosage:

300g/t concentrate feed

Recommended application range 0.5 to 1.5 g/head/day

300 g/t calf milk replacer (CMR)

Homogeneously mix in premixes, mineral, finished feed or milk replacer.

Packing:

Digestarom® is available in 25 kg boxes.

Stability:

Digestarom® must be stored in a cool and dry place, in original packing.

The minimum shelf life is 12 months from production date when stored properly.
