# Mycofix® Plus 5.E

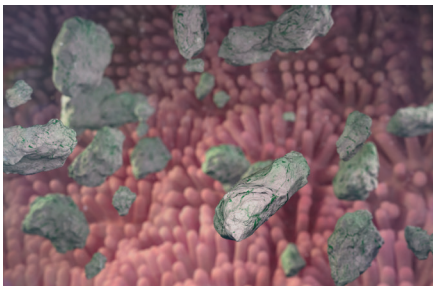

## Absolute Protection

**For the most complete mycotoxin risk management**

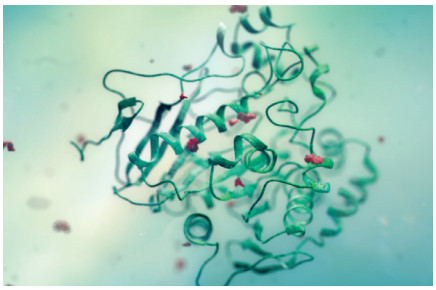

Mycofix® unites three strategies to combat mycotoxins using patented proprietary technology, making it the most scientifically advanced mycotoxin protection available.

### 1. Adsorption

A synergistic blend of minerals to bind aflatoxins and ergot alkaloids as well as endotoxins.

### 2. Biotransformation

A unique combination of patented specific enzymes and biological components:

- FUMzyme®
- Biomin® BBSH® 797
- Biological Constituent

### 3. Bioprotection

The bioprotection mix to prevent the toxic effects caused by all mycotoxins.

# Mycofix® Plus 5.E

## Absolute Protection

### Recommended for all breeding animals:

### Five proven benefits:

- The all-in-one mycotoxin risk management solution to protect animals against mycotoxins and endotoxins based on biotransformation, adsorption and bioprotection
- EU authorized and patented product ingredients proven to adsorb aflatoxins[1] and biotransform trichothecenes[2] and fumonisins[3] into non-toxic metabolites
- Diminishes zearalenone-related fertility problems
- Reduces liver problems and supports the immune system
- Supports the intestinal barrier and the tight junctions to prevent the negative effects of mycotoxin

### Administration

Mycofix® Plus 5.E is added directly into the feed during mixing

### Dosage

0.5 – 2.0 kg/mt of finished feed*

*depending on the contamination level and production phase

### Packing

25 kg plastic bag in corrugated carton

### Stability and storage

18 months from production date when stored in original packing under dry and cool conditions, avoiding direct sunlight.
